August 21, 2015

Weymouth Retirement System
807 Broad Street
Weymouth, MA 02189

Dear Members of the Board:

For the purpose of satisfying the requirements of the Government Accounting Standards Board (GASB) Statements No. 67 and 68, Stone Consulting, Inc. has prepared a set of illustrative tables and other Required Supplementary Information (RSI) based on the January 1, 2014 actuarial valuation of the Weymouth Retirement System performed by Stone Consulting, Inc. The valuation and this report were prepared using generally accepted actuarial principles and practices and meet the parameters set by the Governmental Accounting Standards Board (GASB).

For GASB 67 the results are as of a valuation date of January 1, 2014 and a reporting date of December 31, 2014. For GASB 68 the results are as of a valuation date of January 1, 2014, a measurement date of December 31, 2014 and a reporting date of June 30, 2015. To the best of our knowledge, this report is complete and accurate, and the assumptions used represent our best estimate of anticipated experience of the system. The methods, assumptions, and plan provisions used to prepare these exhibits are consistent with those used in the valuation, and are outlined in the January 1, 2014 valuation report.

We are pleased to present these exhibits. If the Weymouth Retirement Board has any questions on the content of this report, we would be glad to respond. Please note that this report is meant to be used in its entirety. Use of excerpts of this report may result in a misleading or inaccurate understanding of the results.

The undersigned is a consultant for Stone Consulting, Inc. and a member of the American Academy of Actuaries and meets the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

Respectfully submitted,
STONE CONSULTING, INC.
Actuaries for the Plan

Lawrence B. Stone
Member, American Academy of Actuaries

GASB Statements No. 67 and 68 – Net Pension Liability

The components of the Net Pension Liability of the Weymouth Retirement System as of December 31, 2014 were as follows:

Total Pension Liability (TPL)	\$ 263,436,410
Plan Fiduciary Net Position (FNP)	<u>171,967,686</u>
System's Net Pension Liability (NPL)	\$ 91,468,724
Plan FNP as a percentage of the TPL	65.3%
Covered Payroll	\$ 37,327,786
Plan NPL as a percentage of Covered Payroll	245.0%

Changes to the Net Pension Liability [GASB 68, Paragraph 44]

	Total Pension Liability (a)	Plan Fiduciary Net Position (b)	Net Pension Liability (a) - (b)
Balances at beginning of Measurement Period (1/1/2014)	\$ 256,301,759	\$ 165,228,288	\$ 91,073,472
Changes for the Year:			
Service Cost	4,735,778		4,735,778
Interest	19,868,827		19,868,827
Change in benefit terms	0		0
Differences between expected and actual experience	0		0
Change in assumptions	0		0
Contributions - employer		9,483,880	(9,483,880)
Contributions - employee		3,993,520	(3,993,520)
Net investment income		11,176,166	(11,176,166)
Benefit payments, including refunds of employee contributions	(17,469,954)	(17,469,954)	0
Administrative expense*		(444,214)	444,214
Other changes		0	0
Net Changes	<u>7,134,651</u>	<u>6,739,398</u>	<u>395,253</u>
Balances at end of Measurement Period (12/31/2014)	\$ 263,436,410	\$ 171,967,686	\$ 91,468,724

* As part of administrative expense, we included the asset consultants. We believe this is appropriate since asset consulting expenses are not directly related to asset size and therefore we do not include them in the investment expense.

Update procedures were used to roll the Total Pension Liability forward from the valuation date (1/1/2014) to the measurement date (12/31/2014). [GASB Statement No. 68, Paragraph 45 a.]

Projection of the Net Pension Liability

TOTAL PENSION LIABILITY (TPL)

The Total Pension Liability at the beginning of the measurement period (1/1/2014) is equal to the Actuarial Accrued Liability (AAL) calculated as of that date. GASB Statement No. 68, Paragraph 32 requires that the AAL be calculated under the Entry Age Normal Cost Method. For future measurements, the value of the TPL at the beginning of the measurement period will be calculated by projecting the previous TPL. Any future differences between projected amounts and the actual value that are not the result of changes in assumptions or plan provisions will be recognized as "Differences between actual and expected experience".

The TPL is projected to the end of each measurement period (12/31/2014) by adding all of the changes resulting from experience, assumption changes, and changes to plan provisions. Interest is given to the TPL, Service Cost, and paid benefits, and added to the total, less the projected benefit payments for the year. Changes due to expected and actual gains on pension plan assets will be recognized over a five-year period [GASB Statement No. 68, Paragraph 33b], and liabilities arising from changes in plan structure or assumptions will be spread over the lifetime of the current employees [GASB Statement No. 68, Paragraph 33a].

The TPL shown is different from the AAL shown in the January 1, 2014 actuarial valuation report. This is due to a different treatment of net 3(8)(c) payments. In the funding valuation we fund the net 3(8)(c) payments on a pay-as-you-go basis. For GASB Statements No. 67 and 68 we have developed a liability amount of \$528,490, which we have added to the funding AAL to derive the Total Pension Liability. The liability is calculated by assuming that every dollar of 3(8)(c) net benefit generates the same amount of liability as a dollar of the total retirement benefit.

PLAN FIDUCIARY NET POSITION (FNP)

GASB Statement No. 68, Paragraph 20 requires that Market Value of Assets be used for the Fiduciary Net Position. Net investment income is the portion of the change in assets during the measurement period not attributed to employee/employer contributions, benefits payments, administrative expense, or other changes.

The projected Net Pension Liability (NPL) for the end of the year is the portion of the TPL not covered by the FNP. This amount is presented as a percentage of covered employee payroll. The NPL ratio for Weymouth is 245.0%.

Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions [GASB 68, Paragraph 44 h.]

	Deferred Outflows Of Resources	Deferred Inflows Of Resources
Differences between expected and actual experience	\$ 0	\$ 0
Changes of assumptions	0	0
Changes of benefit terms	0	0
Net difference between projected and actual earnings on pension plan investments	<u>1,328,691</u>	<u>0</u>
Total	\$ 1,328,691	\$ 0

Year Ending December 31, *	Recognition
2015	\$ 332,173
2016	332,173
2017	332,173
2018	332,173
2019	0
Thereafter	0

*The years are based on measurement date. For GASB 68, the reporting date is six months later, so the year ending December 31, 2015 is Fiscal 2016.

Long-Term Expected Real Rate of Return

The long-term expected real rate of return reflects the expected rate of return on plan assets minus the expected rate of inflation. This is useful to compare to the discount rate. Note that the discount rate includes the effect of inflation. It is a long-term assumption and is meant to reflect a best estimate of future experience, based on Weymouth's asset allocation. The Board's investment consultant, Fiduciary Investment Advisors, has prepared this analysis.

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return (Geometric Average)
Core Fixed Income	20.00%	1.00%
Domestic Large Cap	34.00%	5.25%
Domestic Small Cap	5.50%	5.55%
International Equity	17.50%	5.50%
Real Estate	10.00%	4.25%
Commodities	1.00%	2.60%
Hedge Funds	7.00%	4.00%
Private Equity	5.00%	6.25%

Discount Sensitivity [GASB 68, Paragraph 42 g.]

The following presents Weymouth's Net Pension Liability calculated at the valuation discount rate of 7.875%, as well as at discount rates one percent higher (8.875%) and one percent lower (6.875%).

Fiscal Year	1% Decrease (6.875%)	Current Discount Rate (7.875%)	1% Increase (8.875%)
2015	\$ 119,996,626	\$ 91,468,724	\$ 68,340,879

Distribution of the Member Population

As of January 1, 2014, the following employees were covered by the benefits terms:

Inactive employees or beneficiaries currently receiving benefits	624
Inactive employees entitled to a return of contributions	144
Active employees	<u>823</u>
TOTAL	1,591

Development of Exhibits

DISCOUNT RATE

Calculations were based on a discount rate assumption of 7.875%, which is consistent with the 1/1/2014 valuation. One of the objectives of the provisions introduced by GASB 68 is to examine how benefit payments and plan contributions and investment earnings interact on a cash flow basis. GASB requires that these amounts be calculated with Market Value of Assets and using the Entry Age Normal cost method.

Projected contributions for each year are the sum of the projected normal cost, the amortization of the unfunded liability, administrative expense, and other benefit costs such as 3(8)(c) payments. The amortization bases and periods are consistent with those seen in the valuation report. Administrative expenses are increased by 4.25% per year.

Weymouth's Fiduciary Net Position was projected to be available to make all future benefit payments of current active and inactive employees. Thus, the long-term expected rate of return on investments was applied for all benefit periods when calculating the Net Pension Liability.

GASB Statement No. 67, Paragraph 30 b. 4 requires that a return rate for the measurement period be developed using the market value of assets at the beginning of the measurement period, along with monthly cash flows. This has been done for the 2014 calendar year, and is shown below and on page 13.

Calendar Year	2014
Money-Weighted Rate of Return	6.91%

**Schedule of Changes in Weymouth's
Net Pension Liability and Related Ratios**

(Amounts in Thousands)

Fiscal Year *	2015	2014	2013	2012	2011	2010	2009	2008	2007	2006

Components of Weymouth's Pension Expense for the Fiscal Year Ended June 30, 2015 [GASB 68, Paragraph 33]

NOTE*	Description	Fiscal 2015
A	Service Cost	\$ 4,735,778
A, B	Interest on the Total Pension Liability	19,868,827
C	Differences between Expected and Actual Experience	0
D	Changes of Assumptions	0
D	Changes to Benefit Provisions	0
A	Employee Contributions	(3,993,520)
E	Projected Earnings on Pension Plan Investments	(12,837,030)
F	Differences between Projected and Actual Earnings on Plan Investments	332,173
A	Pension Plan Administrative Expense	444,214
A	Other Changes in Fiduciary Net Position	<u>0</u>
	Total Pension Expense	\$ 8,550,442

* Notes shown on following page. Amounts are based on the following dates:

- **Valuation date:** January 1
- **Measurement date:** December 31
- **Reporting date:** following June 30

CHANGES IN METHODS, ASSUMPTIONS, AND PLAN PROVISIONS

The assumptions and methods used to generate these exhibits are consistent with those used in the January 1, 2014 actuarial valuation of Weymouth performed by Stone Consulting, Inc. unless otherwise noted. There are no changes in assumptions or benefit provisions to reflect as this is the first year in which Weymouth will satisfy the requirements of GASB Statements No. 67 and 68. Any gains or losses resulting from future changes will be recognized over the average service lifetime of plan members.

RESULTS BY EMPLOYER

Exhibits are provided beginning on page 14 which provide individual results for the various employers that make up the Weymouth Retirement System. Pension expense, as well as any deferred inflows and outflows of resources, have been allocated to the various employers in the same manner as the portion of the FY2015 appropriation that is not related to ERI payments. The liability related to future ERI payments (\$2,430,224 and \$111,986 for the Town and Housing Authority, respectively) was removed from the collective Net Pension Liability, with the remainder of the NPL then being allocated using the same employer percentages as the non-ERI portion of the FY2015 appropriation. The Net Pension Liability for the Town and Housing Authority were then increased by their ERI liabilities. Excess of contributions resulting from the federal grant have been allocated to the school.

NOTES

- A. See the RSI schedule of changes to the net pension liability, on page 2.
- B. Events that impact the total pension liability are assumed to happen evenly throughout the period. In addition, the amount of interest on the total pension liability is calculated using an interest rate equal to the discount rate that was used to determine the service cost. The amount is determined as follows:

Description	Amount for Period (a)	Portion of Period (b)	Interest Rate (c)	Interest on the Total Pension Liability (a) x (b) x (c)
Beginning total pension liability	256,301,759	100%	7.875%	20,183,764
Service cost	4,735,778	100%	7.875%	372,943
Benefit payments	(17,469,954)	50%	7.875%	(687,879)
Total interest on the net pension liability				19,868,827

- C. Differences between expected and actual experience recognized in the current period in accordance with paragraph 33a of Statement 68. For the detailed calculation of this amount, see the schedule on page 10.
- D. Assumption and plan provision changes recognized in pension expense in the current period in accordance with paragraph 33a of Statement 68. For detailed calculations of these amounts, see the schedules on pages 10-11.
- E. Changes in the amounts invested are assumed to occur evenly throughout the period. In addition, the amount of projected earnings on pension plan investments is calculated using the assumed rate of return on pension plan investments as of the beginning of the period. The amount is determined as follows:

Description	Amount for Period (a)	Portion of Period (b)	Projected Rate of Return (c)	Projected Earnings (a) x (b) x (c)
Beginning plan fiduciary net position	165,228,288	100%	7.875%	13,011,728
Employer contributions	9,483,880	50%	7.875%	373,428
Employee contributions	3,993,520	50%	7.875%	157,245
Benefit payments, including refunds of employee contributions	(17,469,954)	50%	7.875%	(687,879)
Administrative expense and other	(444,214)	50%	7.875%	(17,491)
Total projected earnings				\$12,837,030

- F. Differences between projected and actual earnings recognized in the current period in accordance with paragraph 33b of Statement 68. For detailed calculation of this amount, see the schedule on page 11.

Increase / (Decrease) in Pension Expense Arising from the Recognition of the Effects of Differences between Expected and Actual Experience
