Weymouth Retirement System
807 Broad Street
Weymouth, MA 02189

To the Weymouth Retirement Board:

For the purpose of satisfying the requirements of the Government Accounting Standards Board (GASB) Statements No. 67 and 68, Stone Consulting, Inc. has prepared a set of illustrative tables and other Required Supplementary Information (RSI) based on the January 1, 2022 actuarial valuation of the Weymouth Retirement System performed by Stone Consulting, Inc.

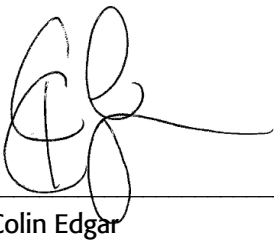

The valuation and this report are based on data provided by the Weymouth Retirement System, and were prepared using generally accepted actuarial principles and practices and meet the parameters set by the Governmental Accounting Standards Board (GASB).

To the best of our knowledge, this report is complete and accurate, and the assumptions used represent a reasonable estimate of anticipated experience of the system. Stone Consulting, Inc. is completely independent of the Town of Weymouth and the Weymouth Retirement System. This includes any of its officers and key personnel. Neither we or anyone else closely associated with us has any relationship with either that would impair our independence, other than this or related assignments such as OPEB valuations for the Town.

We are pleased to present these exhibits. If the Board has any questions on the content of this report, we would be glad to respond. Please note that this report is meant to be used in its entirety. Use of excerpts of this report may result in a misleading or inaccurate understanding of the results.

The undersigned is a consultant for Stone Consulting, Inc. and a member of the American Academy of Actuaries and meets the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

Respectfully submitted,
STONE CONSULTING, INC.
Actuaries for the Plan

Colin Edgar
Member, American Academy of Actuaries

Summary of Results

This report has been prepared for the purpose of satisfying the requirements of GASB Statements No. 67 and 68. For GASB 67 the results are as of a valuation date of January 1, 2022 and a reporting date of December 31, 2022. For GASB 68 the results are as of a valuation date of January 1, 2022, a measurement date of December 31, 2022 and a reporting date of June 30, 2023.

The methods, assumptions, and plan provisions used to prepare these exhibits are consistent with those used in the funding valuation, and are outlined in the January 1, 2022 funding valuation report unless otherwise stated in this report.

Highlights of the results for the Weymouth Retirement System as of December 31, 2022 are as follows:

Total Pension Liability (TPL)	\$ 366,304,686
Plan Fiduciary Net Position (FNP)	<u>239,919,918</u>
System's Net Pension Liability (NPL)	\$ 126,384,768
Plan FNP as a percentage of the TPL	65.5%
Covered payroll	\$ 50,792,962
Plan NPL as a percentage of covered payroll	248.8%
Pension Expense	\$ 17,936,111

NOTE: Totals in this report may not sum due to rounding

The TPL, FNP, and NPL are all developed and discussed on the following two pages, followed by the pension expense and deferrals.

Distribution of the Member Population

As of January 1, 2022, the following employees were covered by the benefits terms:

Inactive employees or beneficiaries currently receiving benefits	659
Inactive employees entitled to a return of contributions	301
Active employees	<u>878</u>
TOTAL	1,838

Changes to the Net Pension Liability

	Total Pension Liability (a)	Fiduciary Net Position (b)	Net Pension Liability (a) - (b)
Balances at beginning of Measurement Period (01/01/2022)	\$ 346,639,494	\$ 280,011,035	\$ 66,628,459
<u>Changes for the Year:</u>			
Service Cost	6,948,031		6,948,031
Interest	24,829,571		24,829,571
Change in benefit terms	1,780,369		1,780,369
Differences between expected and actual experience	472,285		472,285
Change in assumptions	7,856,309		7,856,309
Contributions - employer		13,188,570	(13,188,570)
Contributions - employee		5,106,689	(5,106,689)
Net investment income		(35,666,089)	35,666,089
Benefit payments, including refunds of employee contributions	(22,221,374)	(22,221,374)	0
Administrative expense		(498,913)	498,913
Other changes		0	0
Net Changes	<u>19,665,192</u>	<u>(40,091,117)</u>	<u>59,756,309</u>
Balances at end of Measurement Period (12/31/2022)	\$ 366,304,686	\$ 239,919,918	\$ 126,384,768

*Update procedures were used to roll the Total Pension Liability forward from the valuation date (01/01/2022) to the measurement date (12/31/2022). [GASB 68, Paragraph 80 c.]

CHANGES IN METHODS, ASSUMPTIONS, AND PLAN PROVISIONS

This report is based on the results of the January 1, 2022 actuarial valuation. The 2022 valuation included a reduction of the discount rate from 7.25% to 7.00%, and an update of the mortality assumption. The effect of these changes increased the Net Pension Liability by \$7.9 million, shown above as "Change in assumptions". The 2022 valuation also included an increase of the COLA Base from \$12,000 to \$13,000; this increased the Net Pension Liability by \$1.8 million, shown above as "Change in benefit terms".

Projection of the Net Pension Liability

TOTAL PENSION LIABILITY (TPL)

The Total Pension Liability at the beginning of the measurement period (01/01/2022) is equal to the TPL from the end of the previous measurement period. The TPL is rolled forward through each measurement period by:

- Adding the Service Cost,
- Subtracting benefits paid,
- Applying interest (as calculated on page 6), and
- Recognizing any changes from new valuation results.

The Actuarial Accrued Liability (AAL), calculated as of the valuation date, is compared to the projected TPL. The difference between the two figures is measured as of the measurement date, and allocated to the following categories:

- Changes in assumptions
- Changes of plan provisions
- The remainder of the difference is allocated to "Differences between actual and expected experience"

All of these changes are recognized immediately in the TPL. Their treatment in the pension expense is discussed on the following page. Note that the TPL shown includes a 1/1/2022 liability of \$274,399 for net 3(8)(c) payments, calculated by assuming that every dollar of 3(8)(c) net benefit generates the same amount of liability as a dollar of the total retirement benefit, and rolled forward with the rest of the TPL. This method differs from the funding valuation, where net 3(8)(c) payments are funded on a pay-as-you-go basis and no explicit liability is calculated.

PLAN FIDUCIARY NET POSITION (FNP) AND NET PENSION LIABILITY (NPL)

GASB Statement No. 68, Paragraph 59 requires that the fair value of assets be used for the Fiduciary Net Position. For the fair value of assets we used the market value of assets adjusted by payables and receivables.

The Net Pension Liability (NPL) is the portion of the TPL not covered by the FNP. This amount is presented as a percentage of covered payroll. The NPL ratio for the Weymouth Retirement System is 248.8% of covered pay. In this report, covered pay is reported as described in GASB Statement No. 82 – pensionable payroll for the measurement period.

PENSION EXPENSE AND NET DEFERRALS

For the Pension Expense, gain and losses are recognized over a period of multiple years, with a portion being recognized immediately and the remainder being added to deferred inflows and outflows:

- Asset gains and losses are recognized over a five-year period [GASB 68, Paragraph 71b]
- Experience and Assumption changes are recognized over the average remaining service of the current members [GASB 68, Paragraph 71a]
- Plan provision changes are recognized immediately

Some inflows/outflows which originated in prior measurement periods will continue to be recognized this period. The total amount to be recognized this period is part of the pension expense; the remainder is included in the deferrals. Both are shown on the following page, and are calculated in greater detail on pages 9-10.

RESULTS BY EMPLOYER

Exhibits are provided beginning on page 16 which provide individual results for the various employers that make up the Weymouth Retirement System. Pension expense, as well as any deferred inflows and outflows of resources, and any excess contribution generated by Federal Grants, have been allocated to the various employers in the same manner as the FY2023 appropriation.

Per GASB 68, the change in proportionality from FY2022 to FY2023 of the individual employers' NPL and deferred inflows and outflows need to be allocated to the individual employers. This is calculated on page 16. These amounts are then recognized over the average remaining service, which is 4.8 years. The recognition of proportion changes is developed on page 17.

Pension Expense for the Fiscal Year Ended June 30, 2023

NOTE*	Description	Fiscal 2023
A	Service Cost	\$ 6,948,031
A, B	Interest on the Total Pension Liability	24,829,571
C	Differences between Expected and Actual Experience	917,377
D	Changes of Assumptions	3,757,539
D	Changes to Benefit Provisions	1,780,369
A	Employee Contributions	(5,106,689)
E	Projected Earnings on Pension Plan Investments	(20,140,393)
F	Differences between Projected and Actual Earnings on Plan Investments	4,451,393
A	Pension Plan Administrative Expense	498,913
A	Other Changes in Fiduciary Net Position	<u>0</u>
	Total Pension Expense	\$ 17,936,111

* Notes shown on following page.

Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

	Deferred Outflows Of Resources	Deferred Inflows Of Resources
Differences between expected and actual experience	\$ 628,425	\$ 0
Changes of assumptions	8,083,499	0
Net difference between projected and actual earnings on pension plan investments	<u>20,655,530</u>	<u>0</u>
TOTAL	\$ 29,367,454	\$ 0

Year Ending December 31, *	Recognition
2023	\$ 1,964,181
2024	\$ 6,531,177
2025	\$ 8,322,701
2026	\$ 12,549,395
2027	\$ 0
Thereafter	\$ 0

*The years are based on measurement date. For GASB 68, the year ending December 31, 2023 is Fiscal 2024.

NOTES

- A. See the RSI schedule of changes to the net pension liability, on page 2.
- B. The reduction of discount rate to 7.00% in the 2022 valuation is effective as of 1/1/2022. For the measurement period leading up to that date, the prior rate of 7.25% applies. The amount of interest on the TPL is determined as follows:

Description	Amount for Period (a)	Portion of Period (b)	Interest Rate (c)	Interest on the TPL (a) x (b) x (c)
Beginning TPL	\$ 346,639,494	100%	7.25%	\$ 25,131,363
Service cost	6,948,031	100%	7.25%	503,732
Benefit payments	(22,221,374)	50%	7.25%	(805,525)
Total interest on the NPL				\$ 24,829,571

- C. Differences between expected and actual experience recognized in the current period in accordance with paragraph 71a of Statement 68. For the detailed calculation of the recognition of this amount, see the schedules on page 9.
- D. Assumption and plan provision changes recognized in pension expense in the current period in accordance with paragraph 71a of Statement 68. For detailed calculation of the recognition of these amounts, see the schedule on page 9.
- E. As with the interest calculation above, a rate of 7.25% applies. The amount of projected earnings are determined as follows:

Description	Amount for Period (a)	Portion of Period (b)	Projected Rate of Return (c)	Projected Earnings (a) x (b) x (c)
Beginning FNP	\$ 280,011,035	100%	7.25%	\$ 20,300,800
Employer contributions	13,188,570	50%	7.25%	478,086
Employee contributions	5,106,689	50%	7.25%	185,117
Benefit payments	(22,221,374)	50%	7.25%	(805,525)
Administrative expense and other	(498,913)	50%	7.25%	(18,086)
Total projected earnings				\$ 20,140,393
Actual investment earnings				<u>(35,666,089)</u>
Difference: (Gain)/Loss				\$ 55,806,482

- F. Differences between projected and actual earnings recognized in the current period in accordance with paragraph 71b of Statement 68. For detailed calculation of the recognition of this amount, see the schedule on page 9.

Discount Sensitivity

The following presents the Weymouth Retirement System’s Net Pension Liability calculated at the valuation discount rate of 7.00%, as well as at discount rates one percent lower (6.00%) and one percent higher (8.00%).

Fiscal Year	1% Decrease (6.00%)	Current Discount Rate (7.00%)	1% Increase (8.00%)
2023	\$ 165,999,661	\$ 126,384,768	\$ 92,800,541

Long-Term Expected Real Rate of Return

The long-term expected real rate of return reflects the expected rate of return on plan assets minus the expected rate of inflation. Note that the discount rate includes the effect of inflation. The long-term real rate of return removes the effect of inflation on the return amounts. It is a long-term assumption and is meant to reflect a reasonable estimate of future experience, based on the expected asset allocation.

Allocation percentages are based on information provided by the Weymouth Retirement System and Fiduciary Investment Advisors. The real rates of return below are based on estimates provided by Fiducient Advisors, adjusted using their 2.8% inflation assumption.

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return (Geometric Average)
US Bond	10.50%	1.10%
US Bonds - Dynamic	3.00%	1.10%
Global Bonds	5.00%	0.70%
US Equity (Large Cap)	28.00%	4.50%
US Equity (Small Cap)	10.00%	4.80%
International Equity	17.50%	8.00%
Private Real Estate	10.00%	4.80%
Broad Real Assets	4.00%	3.40%
Hedge Funds	7.00%	5.20%
Private Equity	5.00%	7.60%

Development of Results

DISCOUNT RATE

Projections were made using a discount rate assumption of 7.00%, which is consistent with the actuarial funding valuation. One of the objectives of the provisions of GASB 68 is to examine how benefit payments and plan contributions and investment earnings interact on a cash flow basis. GASB requires that these amounts be calculated with Market Value of Assets and using the Entry Age Normal cost method.

Projected contributions for each year are the sum of:

- Projected normal cost,
- Amortization of the unfunded liability,
- Administrative expense, and
- Other benefit costs such as 3(8)(c) payments.

The amortization bases and periods are consistent with those seen in the valuation report. Administrative expenses are increased by 3.00% per year. The Weymouth Retirement System's Fiduciary Net Position was projected to be available to make all future benefit payments of current active and inactive employees. Thus, the long-term expected rate of return on investments was applied for all benefit periods when calculating the Net Pension Liability.

The long-term rate of return which was used to develop the discount rate of 7.00% includes the effect of inflation (not subtracted out as in the real rates of return). It is based on a combination of expected rates of return on the mix of current and expected investments over a long-term period. These expectations are based on current market conditions, historical experience and future expectations. It assumes a rebalancing of assets on an ongoing basis as well as a constant monitoring of asset allocation and manager performance.

EXHIBITS

The recognition and deferral of various gains and losses are developed on the following two pages. These are followed by historical exhibits displaying changes in the NPL and contribution amounts for past years, the money-weighted rate of return, and finally the exhibits which display results by employer (including an exhibit which reconciles the last year's NPL with the current NPL).

Increase / (Decrease) in Pension Expense Arising from the Recognition of the Effects of Differences between Expected and Actual Experience

Year	Differences between actual and expected experience	Recognition period (years)	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027	2028
